Art Unit: 2832

DETAILED ACTION

Claim Rejections - 35 USC § 112

The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

Claims 16-22 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

Regarding claim 16, applicant should clarify what is intended by "non-parallel to the centerline to endow zones at opposite sides of the core."

Regarding claim 19, applicant should clarify what is intended by "that endow opposite sides of the core with zones that have a defined longitudinal profile."

Regarding claim 21, applicant should clarify what is intended by "with which the two laminations bounding the stack are respectively in contact comprise such tabs in contact with the respective tabs of the two laminations bounding the stack."

Claim Rejections - 35 USC § 102

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless -

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claims 19-22, as best understood in view of the rejections under 35 U.S.C. 112 second paragraph, are rejected under 35 U.S.C. 102(b) as being anticipated by Kikuta et al. [US 5,703,556].

Application/Control Number: 10/666,904

Art Unit: 2832

Kikuta et al. discloses a core structure for an ignition coil [figures 3-6] comprising:

- a plurality of individual stacked flat laminations [figures 3-4] arranged parallel to a

centerline, each lamination comprises opposite longitudinal edges that are non-parallel to the

center line to endow zones at opposite sides of the core with a substantially frustoconical profile

[figure 6].

- the zones are separated by flat outer faces [figure 3].

wherein some of the laminations comprising tabs [10a] projecting outward from their

longitudinal edges beyond the frustoconical profile.

Conclusion

Any inquiry concerning this communication or earlier communications from the

examiner should be directed to TUYEN T NGUYEN whose telephone number is 571-272-1996.

The examiner can normally be reached on M-F 8:30-6:30.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's

supervisor, ELVIN ENAD can be reached on 571-272-1990. The fax phone number for the

organization where this application or proceeding is assigned is 703-872-9306.

Information regarding the status of an application may be obtained from the Patent

Application Information Retrieval (PAIR) system. Status information for published applications

may be obtained from either Private PAIR or Public PAIR. Status information for unpublished

applications is available through Private PAIR only. For more information about the PAIR

system, see http://pair-direct.uspto.gov. Should you have questions on access to the Private PAIR

system, contact the Electronic Business Center (EBC) at 866-217-9197 (toll-free).
